It gives me a great pleasure to inform you that TOTAL Communications is organizing Pakistan's Fourth AI Summit on March 16, 2023 at Shamadan Hall, Serena Hotel, Islamabad.

The objective of this major initiative is to provide a common platform to all the stakeholders including government to learn, discuss opportunities, challenges and the way forward pertaining to ARTIFICIAL INTELLIGENCE.

You are well aware that in the world of science and technology, it is being said that we are at the beginning of the Fourth Industrial Revolution. It is marked by emerging technology breakthroughs primarily in these 10 areas:

Artificial Intelligence (AI), Robotics, Internet of Things (IoT), 5G Broadband, 3D printing, Autonomous Vehicles, Cloud Computing, Blockchain, Biotechnology and Precision Medicine and Augmented Reality. World is moving at a very brisk pace in this direction but Pakistan is still a long way to go. We must step in to take part in shaping this change to benefit from the fruits the world has yet to see'.

Keeping in view the importance of this emerging trend, need of the hour is to bring all stakeholders at a common platform where ideas, knowledge and technology can be shared.

Since Pakistan is early stages in AI, we are planning to invite international subject matter experts from different countries to share the latest AI trends and opportunities.

This premier event will also give your organization an excellent opportunity to present its corporate image in the esteemed gathering and industry. Below is the participation package for your consideration and an early decision will ensure your better placement in this premier event.

I look forward to your confirmation at the earliest.

Thanks and regards,

Faisal Rahim
